

BRUDER 

ADS-18

AUSTRALIAN MADE WITHOUT COMPROMISE

MEET THE ADX-18

Built in Australia using advanced composite construction, the ADX-18 brings Bruder's patented engineering philosophy to the 18-19ft off-road caravan segment. Sharing the same suspension architecture and chassis DNA trusted by commercial expedition operators and the Australian Defence sector, it delivers genuine off-road capability in a more compact footprint.

UNCOMPROMISING IN CAPABILITY

MORE COMPACT THAN THE ADX-21 IN SIZE.

Unique to Bruder, the ADX-18 features dual-side entry, creating a stronger connection to your surroundings. While traditional caravans are built around a single door, the ADX-18 is built around your lifestyle - giving you greater flexibility in choosing camp locations, access points and outlooks wherever you stop. An optional external bathroom access adds even greater convenience to your off-grid adventures.

ALL THE FEATURES OF A FULL-SIZE CARAVAN - WITH BRUDER INNOVATION

- 12" patented suspension travel
- Full composite construction
- Dual-side entry
- Australian-made
- Engineered for remote travel

THE BACKBONE DOES NOT CHANGE

EVERY ADX-18 IS BUILT UPON BRUDER'S PATENTED SUSPENSION SYSTEM.

With up to 12 inches of wheel travel, eight premium remote-reservoir shock absorbers and air suspension technology, the ADX-18 can raise, lower and level itself significantly more than conventional off-road caravans. It delivers exceptional towing control across terrain that challenges traditional independent suspension systems.

Beneath sits Bruder's fully sealed chassis, engineered to withstand the demands of remote off-road travel while protecting critical internals from dust, mud and moisture.

Unique to Bruder, the composite body is isolated from the chassis through high-density mounting points, reducing vibration transfer and enhancing comfort on rough terrain.

Four-wheel hydraulic disc brakes, twin rear recovery points and a DO35 coupling come standard, with an optional rear recovery winch available. Proven engineering. Unmatched capability.

OFF-GRID CONFIDENCE

Powered by a Victron Energy system, the ADX-18 is designed to travel well beyond established campsites.

An 800W solar array, a 300Ah lithium battery system, and a 3000W inverter provide dependable off-grid power while maintaining a lightweight setup. For those seeking additional redundancy, battery capacity can be increased up to 800Ah with up to 1200W of solar.

Developed through years of expedition trailer travel across some of the world's harshest environments, the system delivers the reliability and ease of use expected from a Bruder.

Designed for remote travel. Proven by experience.

DESIGNED AROUND THE DESTINATION

THE ADX-18 IS DESIGNED AROUND THE MOMENTS THAT MATTER.

Dual-side entry opens the living space to the environment around you, creating greater flexibility, natural airflow and a stronger connection to every destination.

Dedicated external bathroom access allows you to step straight into the shower after a day on the beach, in the bush, snow or desert—keeping the living space clean and comfortable.

UNIQUE BRUDER CAPABILITIES FOR A BETTER CAMPING EXPERIENCE.

- Dual-side entry
- External bathroom access
- Full composite construction
- Bruder patented suspension
- Australian-made
- Globally available
